

PLATINUM TOTAL SATISFACTION GUARANTEE

We'll Give You Back More Than Your Money.
We'll Give You Back Your Time.

Choose the right lenses—either NIGHT & DAY® or O₂OPTIX™ — for your patients. If they don't agree they're the best lenses they've ever worn, return the lenses to CIBA Vision and receive full credit for the boxes **plus a \$40 credit for your time**— good towards future CIBA Vision purchases.*

*See Platinum Satisfaction Guarantee return form for full details.

TRADE UP TO BREATHABLE LENSES FOR THE HEALTH OF YOUR PATIENTS' EYES

O₂OPTIX™

A healthy choice for daily wear
or occasional overnight wear

NIGHT & DAY®

The #1
30-night continuous wear lens
in the world

WHO SHOULD TRY THESE LENSES

- Two-week lens patients who can potentially benefit from a healthy daily wear option.
- Patients who exhibit signs and symptoms such as eye redness, indicating the need for a higher level of oxygen.
- Patients who want freedom from the hassles of daily handling and lens care.
- Monthly soft contact lens wearers who plan to sleep in their lenses.
- Patients seeking an alternative to LASIK.

YOUR PATIENTS WILL APPRECIATE

- Comfort for a full day, however long that may be.
- Up to 5x more oxygen than traditional soft contact lenses.
- FDA approved for daily wear and up to 6 nights extended wear.
- Whiter, healthy-looking eyes.
- Up to 6x more oxygen than traditional soft contact lenses.
- Sharp clear vision from the moment you wake up.
- FDA approved for daily wear and up to 30 nights of continuous wear.

KEY TECHNOLOGY

- Revolutionary silicone hydrogel material for soft contact lenses provides increased levels of oxygen through the lens, which helps to promote healthy lens wear.
- A patented biocompatible surface treatment that resists deposits to contribute to healthy lens wear.

REPLACEMENT SCHEDULE

Every 2 weeks

Monthly

*O₂OPTIX Dk/t = 138 @ -3.00D. NIGHT & DAY Dk/t = 175 @ -3.00D. Other factors may impact eye health.

Important Information for O₂OPTIX: For daily/extended wear up to 6 nights for near/ far-sightedness and astigmatism. Risk of serious eye problems (i.e., corneal ulcer) is greater for extended wear. In rare cases, loss of vision may result. Side effects like discomfort, mild burning or stinging may occur.

Brief statement of intended use: NIGHT & DAY lenses (lotrafilcon A) are indicated for daily wear or extended wear for up to 30 continuous nights. **Warning:** The risk of serious ocular complications is greater for extended wear as compared to daily wear of contact lenses and smoking increases the risks. **Precautions:** Not all patients can achieve the maximum wear time of up to 30 nights of continuous wear. Patients should be monitored closely during the first month of 30-night continuous wear. The maximum suggested wearing time should be determined by the eye care professional based upon the patient's physiological eye condition because individual responses to contact lenses vary. **Side effects:** Infiltrative keratitis was reported at a rate of approximately 5% during the one-year US study of 1300 eyes. Other side effects included conjunctivitis, GPC, and lens discomfort, including dryness, mild burning, or stinging. **Contraindications:** The lens should not be used when an inflammation or infection of the eye is present, or when there is any disease or injury in or around the eye or eyelids. The lenses should not be used by individuals who have medical conditions that might interfere with contact lens wear. Consult the package insert for complete information about NIGHT & DAY lenses, available without charge from CIBA Vision Corporation at 1-800-241-5999 or cibavision.com.
